👛 PROFESSIONAL EXPERIENCE

Intermediate Full-Stack Software Developer

Launchcode ☑

11/2020 – 08/2023 | Calgary, Canada

When I started at Launchcode, I worked on software for an Oil and Gas company. Within two months I was the sole developer. Using TypeScript, React, PostgreSQL, etc. I successfully brought the product to market. During the development, I mentored another developer to help deliver the product to the client.

Afterwards, I worked closely with another intermediate developer as well as a senior on an MVP for Cisco. I also worked closely with our Product Owner to deliver the milestones on time and with integration tests, unit tests and documentation.

Junior Full-Stack Software Developer

Routeique ☑

10/2018 – 11/2020 | Calgary, Canada

I worked as an intern for two months then started full-time. During my time at Routeique, I built features for our internal software using PHP (Laravel), JavaScript (jQuery, React), and MySQL. I was responsible for building a recurrence system using industry standards, as well as a dynamic form builder using OOP principles.
